DETAILED ACTION

Remarks

1. In response to communications filed on January 4, 2006, no claims are cancelled; claim 17 has been amended, and no new claims have been added. Therefore, claims 17-32 are still presently pending in the application.

Allowable Subject Matter

2. Claims 17-32 are allowed over prior art made of record.

3. The following is an examiner's statement of reasons for allowance:

The Appellants' arguments filed on January 4, 2006, have been fully considered and are found persuasive.

The prior art of record Frangione et al. (U.S. Patent No. 6,516,189) in view of Fox (U.S. Patent No. 5,765,172), does not teach, disclose or suggest:

In a wireless telecommunications system, a method of synchronizing configuring data, which is utilized for proper operation of a base station, and is stored in a base station database with corresponding configuring data stored in one or more source units each unit having a database for storing configuring data, the base station database and the source unit databases each being arranged in a single data group or a plurality of data groups within each database, and calculating a reference checksum for each of the data groups in the base station database and the source unit database, wherein the

data groups in the base station database correspond with the data groups in the one or more source units, as claimed in independent claim 17.

Claims 18-24 are allowed because they are dependent on independent claim 17.

In a system for synchronizing configuring data stored in a base station database with corresponding configuring data stored in a corresponding one or more source units database, the base station database and the corresponding one or more source units database each being arranged in a data group or a plurality of data groups within each database, and means for calculating reference checksum for each of the data groups in the base station database and the corresponding one or more source units database; comparison means for comparing a calculated checksum of each data group in the base station database to the reference checksum of each corresponding data group in the corresponding one or more source units database, as claimed in independent claim 25.

Claims 26-32 are allowed because they are dependent on independent claim 25.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
